NAMED TRAINER

About the Trainer

Dr Alfred Ang

Principal Trainer · Tertiary Infotech Academy

- Role · Principal trainer and courseware lead
- Certification · Adult education and technology credentials
- Delivers · Accounting, automation, AI, data and digital productivity
- Founder · Tertiary Infotech Academy
- Approach · Concept-led, evidence-based, hands-on
- Contact · enquiry@tertiaryinfotech.com

© Tertiary Infotech Academy Pte Ltd

Let's Know Each Other

1. Name and role
2. Accounting and QuickBooks experience
3. One advanced transaction or reporting challenge
4. What success looks like after two days

© Tertiary Infotech Academy Pte Ltd

LEARNING ENVIRONMENT

Ground Rules

1

Participate

Practise, question, and explain your accounting choices.

2

Protect data

Use only the fictional activity data—never real customer, payroll, tax, or bank credentials.

3

Evidence matters

Keep the workbook, report, screenshot/export, and approval trail together.

4

Return on time

Respect start, break, and submission times.

© Tertiary Infotech Academy Pte Ltd

TWO-DAY LEARNING ARC

Course Outline

01 · Transactions

Advanced AR/AP, inventory, projects, bank rules, reconciliation, adjustments, close, roles, and audit trail.

02 · Reporting

Statements, subledgers, custom reports, ageing, profitability, cash flow, GST, and management action.

03 · Standards

Singapore reporting framework, accrual, revenue, inventory, PPE, FX, estimates, and qualitative characteristics.

© Tertiary Infotech Academy Pte Ltd

9:30 AM–5:30 PM · 7.5 HOURS

Lesson Plan · Day 1

1

09:30–11:00

Admin, prerequisite bridge, control-ready company file, double-entry decision model

2

11:00–13:15

Advanced order-to-cash, procure-to-pay, Activities 1–3

3

13:45–16:00

Recurring transactions, inventory, projects, billable time and costs

4

16:00–17:30

Bank rules, reconciliation, month-end adjustments, close and audit controls

© Tertiary Infotech Academy Pte Ltd

9:30 AM–5:30 PM · 7.5 HOURS

Lesson Plan · Day 2

1

09:30–11:30

Statement architecture, subledger ties, report dimensions and custom reports

2

11:30–13:10

Ageing, profitability, cash flow, GST, management reporting

3

13:40–16:15

Activities 10–11; Singapore framework, accrual, revenue, inventory, PPE and FX

4

16:15–17:30

Estimates, qualitative characteristics, Activity 12 capstone and course review

© Tertiary Infotech Academy Pte Ltd

LMS · CURRENT VERSION

Download Course Material

1. Sign in to the LMS
2. Open this course
3. Choose Courseware
4. Download the current files

https://lms-tms.tertiaryinfotech.com/

© Tertiary Infotech Academy Pte Ltd

CLICKABLE REPOSITORY

Access the Course Activities

OPTION A · CLONE

git clone https://github.com/tertiarycourses/C699-QuickBooks-Accounting-Masterclass.git

OPTION B · ZIP

Open the GitHub repository, choose Code, then Download ZIP.

WORK SAFELY

Use the fictional datasets and a QuickBooks Online practice company. Keep confidential data out of the repository.

01

TOPIC 1

Advanced Transactional Accounting

Control-ready masters · complex AR/AP · inventory · projects · bank feeds · month-end close

© Tertiary Infotech Academy Pte Ltd

TOPIC 1

Key Concepts

1

Control before speed

Automation scales both good coding and bad coding; design approval, evidence, and exception paths first.

2

Subledger discipline

Customer, supplier, inventory, project, bank, and tax subledgers must reconcile to the general ledger.

3

Event-to-entry reasoning

Identify the event, recognition point, accounts, debit/credit, tax treatment, and evidence before posting.

4

Period integrity

Cut-off, accruals, prepayments, depreciation, FX, and reconciliations protect the reporting period.

© Tertiary Infotech Academy Pte Ltd

PREREQUISITE BRIDGE

From basic bookkeeping to advanced control

1

Lens 1

Basic course boundary: navigation, simple invoices, bills, receipts, and standard reports are assumed.

2

Lens 2

Advanced work adds estimates and judgements, linked documents, subledger controls, period-end entries, and evidence.

3

Lens 3

A correct screen entry is not enough: it must post to the right period, account, tax code, project, and counterparty.

4

Lens 4

Every workflow ends with a reconciliation or report-based acceptance test.

© Tertiary Infotech Academy Pte Ltd

PREREQUISITE BRIDGE

From basic bookkeeping to advanced control · Design vs evidence

DESIGN / DECIDE

1. Basic course boundary: navigation, simple invoices, bills, receipts, and standard reports are assumed.
2. Advanced work adds estimates and judgements, linked documents, subledger controls, period-end entries, and evidence.

VERIFY / CONTROL

1. A correct screen entry is not enough: it must post to the right period, account, tax code, project, and counterparty.
2. Every workflow ends with a reconciliation or report-based acceptance test.

© Tertiary Infotech Academy Pte Ltd

Control-ready company file

1

Lens 1

Design a numbered chart of accounts with control accounts, clearing accounts, and reporting-friendly subaccounts.

2

Lens 2

Separate trade receivables/payables, GST input/output, inventory asset/COGS, fixed assets/accumulated depreciation, and suspense.

3

Lens 3

Govern customer, supplier, product/service, payment term, project, class/location, and custom-field masters.

4

Lens 4

Prevent duplicates through naming conventions, ownership, change approval, and periodic inactive-master review.

© Tertiary Infotech Academy Pte Ltd

Control-ready company file · Control flow

1

Design a numbered chart of accounts with control accounts, clearing accounts, and reporting-friendly subaccounts.

2

Separate trade receivables/payables, GST input/output, inventory asset/COGS, fixed assets/accumulated depreciation, and suspense.

3

Govern customer, supplier, product/service, payment term, project, class/location, and custom-field masters.

4

Prevent duplicates through naming conventions, ownership, change approval, and periodic inactive-master review.

© Tertiary Infotech Academy Pte Ltd

Event-to-entry decision model

1

Lens 1

Business event: what happened, with whom, for how much, and when did control/performance occur?

2

Lens 2

Recognition: does the event create an asset, liability, income, expense, equity movement, or disclosure only?

3

Lens 3

Posting: select source document, accounts, debit/credit, GST code, project/segment, date, and supporting evidence.

4

Lens 4

Verification: inspect the audit trail, subledger, trial balance, and financial-statement effect.

© Tertiary Infotech Academy Pte Ltd

Event-to-entry decision model · Three lenses

EVENT

Business event: what happened, with whom, for how much, and when did control/performance occur?

ACCOUNTING

Recognition: does the event create an asset, liability, income, expense, equity movement, or disclosure only?

CONTROL

Posting: select source document, accounts, debit/credit, GST code, project/segment, date, and supporting evidence. Verification: inspect the audit trail, subledger, trial balance, and financial-statement effect.

© Tertiary Infotech Academy Pte Ltd

Accounting Treatment Decision

1

Identify the economic event and recognition point before choosing the QuickBooks form.

EVIDENCE TEST · Contract, invoice, receipt, delivery, approval, and period evidence agree.

© Tertiary Infotech Academy Pte Ltd

Advanced order-to-cash

1

Lens 1

Connect estimate, deposit/advance, invoice or progress invoice, receipt, credit memo, refund, and write-off.

2

Lens 2

Keep customer advances as liabilities until the performance obligation is satisfied; do not force early revenue.

3

Lens 3

Apply receipts to the correct open invoices and investigate unapplied cash and negative customer balances.

4

Lens 4

Use ageing, overdue reminders, statements, credit limits, and collection notes as one controlled cycle.

© Tertiary Infotech Academy Pte Ltd

ACCOUNTS RECEIVABLE

Connect estimate, deposit/advance, invoice or progress invoice, receipt, credit memo, refund, and write-off.

Keep customer advances as liabilities until the performance obligation is satisfied; do not force early revenue. Apply receipts to the correct open invoices and investigate unapplied cash and negative customer balances. Use ageing, overdue reminders, statements, credit limits, and collection notes as one controlled cycle.

© Tertiary Infotech Academy Pte Ltd

WORKED CONTROL CHECK

Advanced order-to-cash · Acceptance logic

01 Connect estimate, deposit/advance, invoice or progress invoice, receipt, credit memo, refund, and write-off.

02 Keep customer advances as liabilities until the performance obligation is satisfied; do not force early revenue.

03 Apply receipts to the correct open invoices and investigate unapplied cash and negative customer balances.

04 Use ageing, overdue reminders, statements, credit limits, and collection notes as one controlled cycle.

© Tertiary Infotech Academy Pte Ltd

Returns, credits, refunds, and bad debts

1

Lens 1

Credit memo reduces the customer's balance; refund receipt records cash returned—choose based on the commercial event.

2

Lens 2

Link the reversal to the original product/service and GST treatment to preserve revenue and tax reporting.

3

Lens 3

A write-off requires evidence of recoverability review and the approved bad-debt account/tax treatment.

4

Lens 4

Monitor unusual credits, backdated changes, duplicate refunds, and manual journals to receivables.

© Tertiary Infotech Academy Pte Ltd

Returns, credits, refunds, and bad debts · Review questions

01 Credit memo reduces the customer's balance; refund receipt records cash returned—choose based on the commercial event.

02 Link the reversal to the original product/service and GST treatment to preserve revenue and tax reporting.

03 A write-off requires evidence of recoverability review and the approved bad-debt account/tax treatment.

04 Monitor unusual credits, backdated changes, duplicate refunds, and manual journals to receivables.

© Tertiary Infotech Academy Pte Ltd

Advanced procure-to-pay

1

Lens 1

Connect purchase request/approval, purchase order, receipt, supplier bill, bill credit, payment, and supplier statement.

2

Lens 2

A purchase order is a commitment, not yet an expense or liability; recognition follows receipt and the applicable policy.

3

Lens 3

Use three-way thinking: order, receipt, and invoice should agree on item, quantity, price, tax, and project.

4

Lens 4

Separate vendor creation, invoice approval, and payment release; investigate duplicate invoice numbers and bank changes.

© Tertiary Infotech Academy Pte Ltd

Advanced procure-to-pay · Design vs evidence

DESIGN / DECIDE

1. Connect purchase request/approval, purchase order, receipt, supplier bill, bill credit, payment, and supplier statement.
2. A purchase order is a commitment, not yet an expense or liability; recognition follows receipt and the applicable policy.

VERIFY / CONTROL

1. Use three-way thinking: order, receipt, and invoice should agree on item, quantity, price, tax, and project.
2. Separate vendor creation, invoice approval, and payment release; investigate duplicate invoice numbers and bank changes.

© Tertiary Infotech Academy Pte Ltd

AUTOMATION

Recurring transactions with governance

1

Lens 1

Scheduled templates post automatically; reminders require review; unscheduled templates standardise repeatable entries.

2

Lens 2

Use recurring entries for predictable amounts only, or pair variable templates with an evidence-based review.

3

Lens 3

Assign an owner, end date, review frequency, tax treatment, and exception rule to every template.

4

Lens 4

Audit the recurring-template list before close and after contract, rate, or GST changes.

© Tertiary Infotech Academy Pte Ltd

Recurring transactions with governance · Control flow

1

Scheduled templates post automatically; reminders require review; unscheduled templates standardise repeatable entries.

2

Use recurring entries for predictable amounts only, or pair variable templates with an evidence-based review.

3

Assign an owner, end date, review frequency, tax treatment, and exception rule to every template.

4

Audit the recurring-template list before close and after contract, rate, or GST changes.

© Tertiary Infotech Academy Pte Ltd

Inventory and cost of sales

1

Lens 1

Purchases increase inventory asset and quantity; sales reduce inventory and recognise cost of goods sold.

2

Lens 2

Reconcile quantity-on-hand, inventory valuation, general-ledger balance, and physical count evidence.

3

Lens 3

Investigate negative inventory, backdated purchases/sales, inactive items, unit-of-measure errors, and unusual adjustments.

4

Lens 4

Adjustments need reason codes, approval, evidence, and an understood profit impact—not a plug to make reports agree.

© Tertiary Infotech Academy Pte Ltd

Inventory and cost of sales · Three lenses

EVENT

Purchases increase inventory asset and quantity; sales reduce inventory and recognise cost of goods sold.

ACCOUNTING

Reconcile quantity-on-hand, inventory valuation, general-ledger balance, and physical count evidence.

CONTROL

Investigate negative inventory, backdated purchases/sales, inactive items, unit-of-measure errors, and unusual adjustments. Adjustments need reason codes, approval, evidence, and an understood profit impact—not a plug to make reports agree.

© Tertiary Infotech Academy Pte Ltd

WORKED CONTROL CHECK

Inventory and cost of sales · Acceptance logic

01 Purchases increase inventory asset and quantity; sales reduce inventory and recognise cost of goods sold.

02 Reconcile quantity-on-hand, inventory valuation, general-ledger balance, and physical count evidence.

03 Investigate negative inventory, backdated purchases/sales, inactive items, unit-of-measure errors, and unusual adjustments.

04 Adjustments need reason codes, approval, evidence, and an understood profit impact—not a plug to make reports agree.

© Tertiary Infotech Academy Pte Ltd

Projects, time, and billable costs

1

Lens 1

Assign revenue, supplier costs, expenses, time, and billable items to the correct customer project.

2

Lens 2

Separate billable status from accounting classification: an expense can be valid but assigned to the wrong project.

3

Lens 3

Compare estimate, invoiced, earned, cost incurred, unbilled time/expense, and margin to expose leakage.

4

Lens 4

Close a project only after final billing, cost capture, write-off decisions, and profitability review.

© Tertiary Infotech Academy Pte Ltd

JOB PROFITABILITY

Assign revenue, supplier costs, expenses, time, and billable items to the correct customer project.

Separate billable status from accounting classification: an expense can be valid but assigned to the wrong project. Compare estimate, invoiced, earned, cost incurred, unbilled time/expense, and margin to expose leakage. Close a project only after final billing, cost capture, write-off decisions, and profitability review.

© Tertiary Infotech Academy Pte Ltd

Bank feeds and rule design

1

Lens 1

A bank-feed line is external evidence, not automatically a new accounting transaction; match before add.

2

Lens 2

Use bank text, description, amount, account, payee, transaction type, category, tax, and project conditions deliberately.

3

Lens 3

Rule priority matters; broad rules can override precise rules and silently misclassify high volumes.

4

Lens 4

Enable auto-add only for stable, low-risk patterns with a periodic exception and sampling review.

© Tertiary Infotech Academy Pte Ltd

Bank feeds and rule design · Review questions

01 A bank-feed line is external evidence, not automatically a new accounting transaction; match before add.

02 Use bank text, description, amount, account, payee, transaction type, category, tax, and project conditions deliberately.

03 Rule priority matters; broad rules can override precise rules and silently misclassify high volumes.

04 Enable auto-add only for stable, low-risk patterns with a periodic exception and sampling review.

© Tertiary Infotech Academy Pte Ltd

Reconciliation as a control

1

Lens 1

Reconciliation proves the ledger agrees to an independent statement at a point in time.

2

Lens 2

Opening balance, statement ending balance, cleared items, outstanding items, and difference form the control equation.

3

Lens 3

Investigate missing, duplicate, altered, stale, and future-dated items; never force a zero with an unexplained adjustment.

4

Lens 4

Preserve the reconciliation report and review changes to previously reconciled transactions in the audit log.

© Tertiary Infotech Academy Pte Ltd

Reconciliation as a control · Design vs evidence

DESIGN / DECIDE

1. Reconciliation proves the ledger agrees to an independent statement at a point in time.
2. Opening balance, statement ending balance, cleared items, outstanding items, and difference form the control equation.

VERIFY / CONTROL

1. Investigate missing, duplicate, altered, stale, and future-dated items; never force a zero with an unexplained adjustment.
2. Preserve the reconciliation report and review changes to previously reconciled transactions in the audit log.

© Tertiary Infotech Academy Pte Ltd

Reconciliation as a control · Acceptance logic

01 Reconciliation proves the ledger agrees to an independent statement at a point in time.

02 Opening balance, statement ending balance, cleared items, outstanding items, and difference form the control equation.

03 Investigate missing, duplicate, altered, stale, and future-dated items; never force a zero with an unexplained adjustment.

04 Preserve the reconciliation report and review changes to previously reconciled transactions in the audit log.

© Tertiary Infotech Academy Pte Ltd

Month-end adjusting entries

1

Lens 1

Accruals recognise incurred costs/revenue before invoice or cash; reverse when the source transaction arrives where appropriate.

2

Lens 2

Prepayments defer expense and release it systematically over the benefit period.

3

Lens 3

Depreciation allocates depreciable amount over useful life; accumulated depreciation preserves gross asset cost.

4

Lens 4

Foreign-currency monetary items may require period-end remeasurement and documented exchange-rate evidence.

© Tertiary Infotech Academy Pte Ltd

Month-end adjusting entries · Control flow

1

Accruals recognise incurred costs/revenue before invoice or cash; reverse when the source transaction arrives where appropriate.

2

Prepayments defer expense and release it systematically over the benefit period.

3

Depreciation allocates depreciable amount over useful life; accumulated depreciation preserves gross asset cost.

4

Close, roles, and audit trail

1

Lens 1

Sequence the close: transaction cut-off, subledgers, reconciliations, adjustments, analytical review, approval, then lock.

2

Lens 2

Apply least privilege and segregation of duties across master data, posting, reconciliation, reporting, and payment.

3

Lens 3

The audit log supports who/what/when investigation; it does not explain business purpose without supporting documents.

4

Lens 4

A close-date password and exception approval reduce unauthorised backdating after management sign-off.

© Tertiary Infotech Academy Pte Ltd

Close, roles, and audit trail · Three lenses

EVENT

Sequence the close: transaction cut-off, subledgers, reconciliations, adjustments, analytical review, approval, then lock.

ACCOUNTING

Apply least privilege and segregation of duties across master data, posting, reconciliation, reporting, and payment.

CONTROL

The audit log supports who/what/when investigation; it does not explain business purpose without supporting documents. A close-date password and exception approval reduce unauthorised backdating after management sign-off.

A01

TOPIC 1 PRACTICE

Progressive Activities

Detailed click-by-click instructions, mock data, workbooks, evidence, and acceptance tests are in each activity folder and the Learner Guide.

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 01 · FOUNDATION BRIDGE

Design a Control-Ready Company File

SCENARIO

Orchid Office Solutions Pte Ltd is moving from basic bookkeeping to a controlled cloud ledger before expanding into project work and inventory.

GOAL

Map opening balances and master data into a numbered chart of accounts with control, clearing, GST, inventory, fixed-asset, and suspense accounts.

DELIVERABLES

1. Approved account-mapping workbook
2. QBO-ready customers, suppliers, and products CSVs
3. Opening-balance and exception log

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 01 · Acceptance Criteria

01 Trial balance debits equal credits

02 All control accounts have an owner and purpose

03 No duplicate active masters

04 Every exception has an owner and due date

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 02 · INTERMEDIATE

Run an Advanced Order-to-Cash Cycle

SCENARIO

Merlion Fit-Outs receives a customer deposit, bills a project in stages, handles a scope reduction, and refunds an overpayment.

GOAL

Process estimate-to-cash events without recognising revenue early or leaving unapplied customer balances.

DELIVERABLES

1. Linked estimate/deposit/invoices/receipt/credit/refund evidence
2. AR ageing
3. Revenue and customer-advance reconciliation

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 02 · Acceptance Criteria

01 No unexplained unapplied cash or negative customer balance

02 Revenue follows the scenario recognition point

03 AR ageing agrees to the control account

04 Credit/refund trace to original GST treatment

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 03 · INTERMEDIATE

Control Procure-to-Pay and Supplier Exceptions

SCENARIO

Harbour Tech Services buys equipment and subcontractor services, receives a price variance, a partial delivery, and a supplier credit.

GOAL

Apply order-receipt-invoice thinking, prevent duplicate liabilities, and preserve approval evidence.

DELIVERABLES

1. PO/bill/bill-credit/payment evidence
2. Supplier statement reconciliation
3. Duplicate and bank-change exception review

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 03 · Acceptance Criteria

01 No duplicate invoice posted

02 AP ageing agrees to control account

03 Partial receipt and price variance are explained

04 Supplier credit is correctly applied

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 04 · INTERMEDIATE

Reconcile Inventory Quantity and Value

SCENARIO

Lion City Components has sales before purchase entry, damaged stock, a count variance, and an obsolete item.

GOAL

Correct quantity and value while explaining the cost-of-sales and profit impact of every adjustment.

DELIVERABLES

1. Inventory import/review file
2. Count and adjustment evidence
3. Inventory valuation-to-GL reconciliation

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 04 · Acceptance Criteria

01 No unexplained negative inventory

02 Valuation agrees to GL

03 Adjustment reasons and approvals are complete

04 COGS impact is explained

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 05 · ADVANCED

Measure Project Profitability and Billing Leakage

SCENARIO

Marina Design Studio tracks fixed-fee design projects with staff time, subcontractors, reimbursable costs, and milestone billing.

GOAL

Capture all project revenue and cost, identify unbilled work, and distinguish accounting accuracy from project performance.

DELIVERABLES

1. Project setup and transactions
2. Unbilled time/expense schedule
3. Project profitability review

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 05 · Acceptance Criteria

01 All attributable activity is assigned

02 Unbilled items are actioned

03 Project report agrees to source schedules

04 Margin conclusion identifies drivers and limits

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 06 · ADVANCED

Engineer Bank Rules and Feed Exceptions

SCENARIO

Northstar Catering receives a month of bank-feed lines with ambiguous descriptions, transfers, card settlements, loan receipts, and recurring rent.

GOAL

Match before add, design precise rule priority, and restrict auto-add to low-risk transactions.

DELIVERABLES

1. Reviewed bank-feed classification
2. Rule register and priority map
3. Exception and sampling evidence

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 06 · Acceptance Criteria

01 Existing entries are matched, not duplicated

02 Rule priority is documented

03 No high-risk auto-add rule

04 Every excluded line has evidence

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 07 · ADVANCED

Resolve a Bank and Credit-Card Reconciliation

SCENARIO

Sunrise Retail's books include a duplicate expense, an outstanding cheque, a missing fee, a deposit in transit, and a changed reconciled item.

GOAL

Reach a supported zero difference without an unexplained forced adjustment.

DELIVERABLES

1. Reconciliation workpaper
2. Correcting-entry evidence
3. Reconciliation report and post-close exception review

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 07 · Acceptance Criteria

01 Reconciliation difference is zero

02 No forced unexplained adjustment

03 Outstanding items roll forward

04 Changes to reconciled items are investigated

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 08 · ADVANCED

Post and Reverse Month-End Adjustments

SCENARIO

CloudWorks Asia closes June with unbilled utilities, prepaid insurance, equipment depreciation, deferred customer revenue, and a USD payable.

GOAL

Prepare supported accrual, deferral, depreciation, and foreign-currency adjustments with reversal logic.

DELIVERABLES

1. Adjustment calculations
2. Journal-entry and reversal evidence
3. Pre/post-adjustment trial-balance bridge

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 08 · Acceptance Criteria

01 Entries balance

02 Calculations are formula-driven and supported

03 Reversals prevent double counting

04 Statement effects match policy

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 09 · ADVANCED

Investigate Audit Log and Close-Control Breaches

SCENARIO

After management sign-off, the controller finds a backdated invoice edit, a deleted bill, a new bank rule, and a supplier bank-detail change.

GOAL

Reconstruct events, assess financial impact, strengthen roles, and lock the approved period.

DELIVERABLES

1. Audit-log investigation
2. Role and segregation-of-duties matrix
3. Close exception and remediation plan

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 09 · Acceptance Criteria

01 Every event is reconstructed

02 Financial impact is quantified

03 Role conflicts are remediated

04 Close is locked with controlled exceptions

© Tertiary Infotech Academy Pte Ltd

WHAT YOU SHOULD NOW BE ABLE TO DO

Topic 1 Recap

1

Explain

State the accounting logic, not only the QuickBooks action.

2

Reconcile

Tie the source, subledger, GL, report, and evidence.

3

Challenge

Investigate exceptions, estimates, feature availability, and period effects.

4

Approve

Record ownership, judgement, conclusion, and sign-off.

© Tertiary Infotech Academy Pte Ltd

Break · Return on time

Use the activity workbook to record unresolved questions before the next section.

© Tertiary Infotech Academy Pte Ltd

02

TOPIC 2

Financial Reporting and Management Insight

Statement integrity · report design · ageing · profitability · GST · variance and decision narratives

© Tertiary Infotech Academy Pte Ltd

Key Concepts

1

Reports are outputs

A polished report cannot repair incomplete, duplicated, misdated, or misclassified transactions.

2

Triangulate

Tie the Profit and Loss, Balance Sheet, Cash Flow, subledgers, and reconciliation evidence together.

3

Segment with purpose

Projects, customers, products, classes, locations, and custom fields answer different management questions.

4

Explain the movement

A management pack pairs numbers with drivers, risks, actions, owners, and due dates.

© Tertiary Infotech Academy Pte Ltd

Financial statement architecture

1

Lens 1

Profit and Loss explains performance over a period; Balance Sheet shows financial position at a date.

2

Lens 2

Cash Flow explains movements in cash; profit can rise while cash falls because timing and non-cash items differ.

3

Lens 3

Retained earnings links current and prior-period results to equity, subject to distributions and adjustments.

4

Lens 4

Report basis, period, comparison, currency, grouping, and accounting method must be explicit.

© Tertiary Infotech Academy Pte Ltd

Financial statement architecture · Design vs evidence

DESIGN / DECIDE

1. Profit and Loss explains performance over a period; Balance Sheet shows financial position at a date.
2. Cash Flow explains movements in cash; profit can rise while cash falls because timing and non-cash items differ.

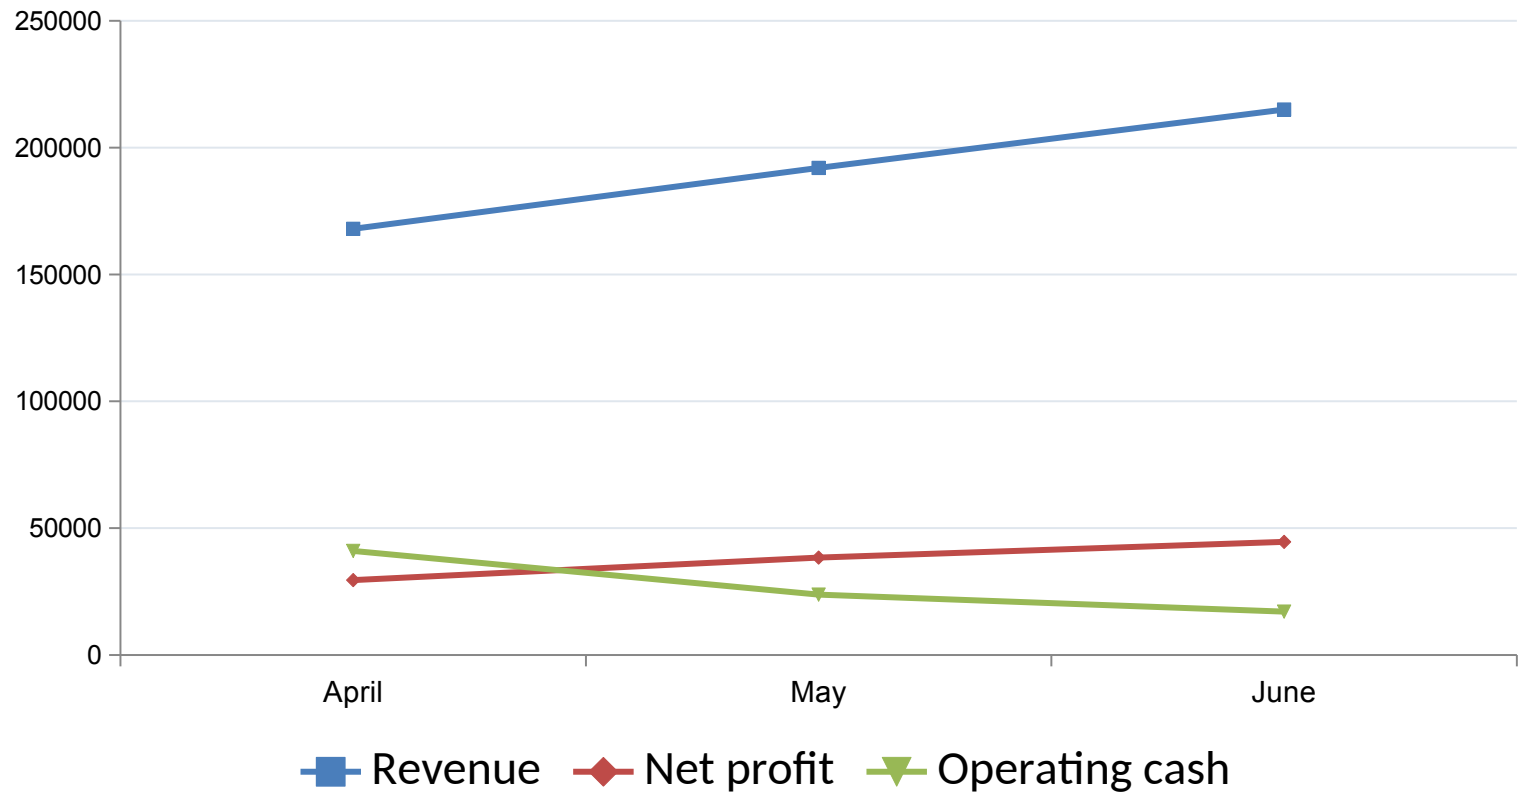

VERIFY / CONTROL

1. Retained earnings links current and prior-period results to equity, subject to distributions and adjustments.
2. Report basis, period, comparison, currency, grouping, and accounting method must be explicit.

© Tertiary Infotech Academy Pte Ltd

EDITABLE NATIVE CHART

Performance and Cash Divergence

READ THE SIGNAL

- Revenue growth is not cash growth
- Explain gross-margin movement
- Quantify drivers and actions

© Tertiary Infotech Academy Pte Ltd

Subledger-to-ledger reporting bridge

1

Lens 1

AR ageing should tie to accounts receivable; AP ageing should tie to accounts payable.

2

Lens 2

Inventory valuation should tie to inventory asset; bank reconciliations should support cash balances.

3

Lens 3

GST detail and control accounts should support the return working paper.

4

Lens 4

A trial balance is mathematically balanced even when classification, timing, or completeness is wrong.

© Tertiary Infotech Academy Pte Ltd

Subledger-to-ledger reporting bridge · Control flow

1

AR ageing should tie to accounts receivable; AP ageing should tie to accounts payable.

2

Inventory valuation should tie to inventory asset; bank reconciliations should support cash balances.

3

GST detail and control accounts should support the return working paper.

4

A trial balance is mathematically balanced even when classification, timing, or completeness is wrong.

© Tertiary Infotech Academy Pte Ltd

Report dimensions and traceability

1

Lens 1

Use customers/projects for counterparty and job profitability; products/services for revenue and margin mix.

2

Lens 2

Use classes or locations for responsibility/operating segments where the subscription supports them.

3

Lens 3

Use custom fields for controlled transaction attributes; avoid free-text labels that cannot be governed.

4

Lens 4

Document feature availability: reports and tracking options vary by QuickBooks Online subscription and region.

© Tertiary Infotech Academy Pte Ltd

Report dimensions and traceability · Three lenses

Custom report design

1

Lens 1

Start with the decision question, user, period, grain, measure, comparison, filter, and required evidence.

2

Lens 2

Choose a base report that contains the necessary transactions and dimensions before customising.

3

Lens 3

Save consistent filters and naming; schedule only after ownership, confidentiality, and recipient accuracy are confirmed.

4

Lens 4

Exported Excel/PDF copies are snapshots—label period, basis, run date, and source company.

© Tertiary Infotech Academy Pte Ltd

QUESTION-LED REPORTING

Start with the decision question, user, period, grain, measure, comparison, filter, and required evidence.

Choose a base report that contains the necessary transactions and dimensions before customising. Save consistent filters and naming; schedule only after ownership, confidentiality, and recipient accuracy are confirmed. Exported Excel/PDF copies are snapshots—label period, basis, run date, and source company.

Receivables and payables analysis

1

Lens 1

Ageing is a risk view, not just a collection list; separate current, overdue, disputed, credit, and unapplied balances.

2

Lens 2

Track days sales outstanding, overdue concentration, promise-to-pay status, and collection outcomes.

3

Lens 3

For payables, combine ageing with due dates, cash forecast, supplier criticality, discounts, and disputed items.

4

Lens 4

Reconcile ageing totals before presenting working-capital conclusions.

© Tertiary Infotech Academy Pte Ltd

Receivables and payables analysis · Review questions

01 Ageing is a risk view, not just a collection list; separate current, overdue, disputed, credit, and unapplied balances.

02 Track days sales outstanding, overdue concentration, promise-to-pay status, and collection outcomes.

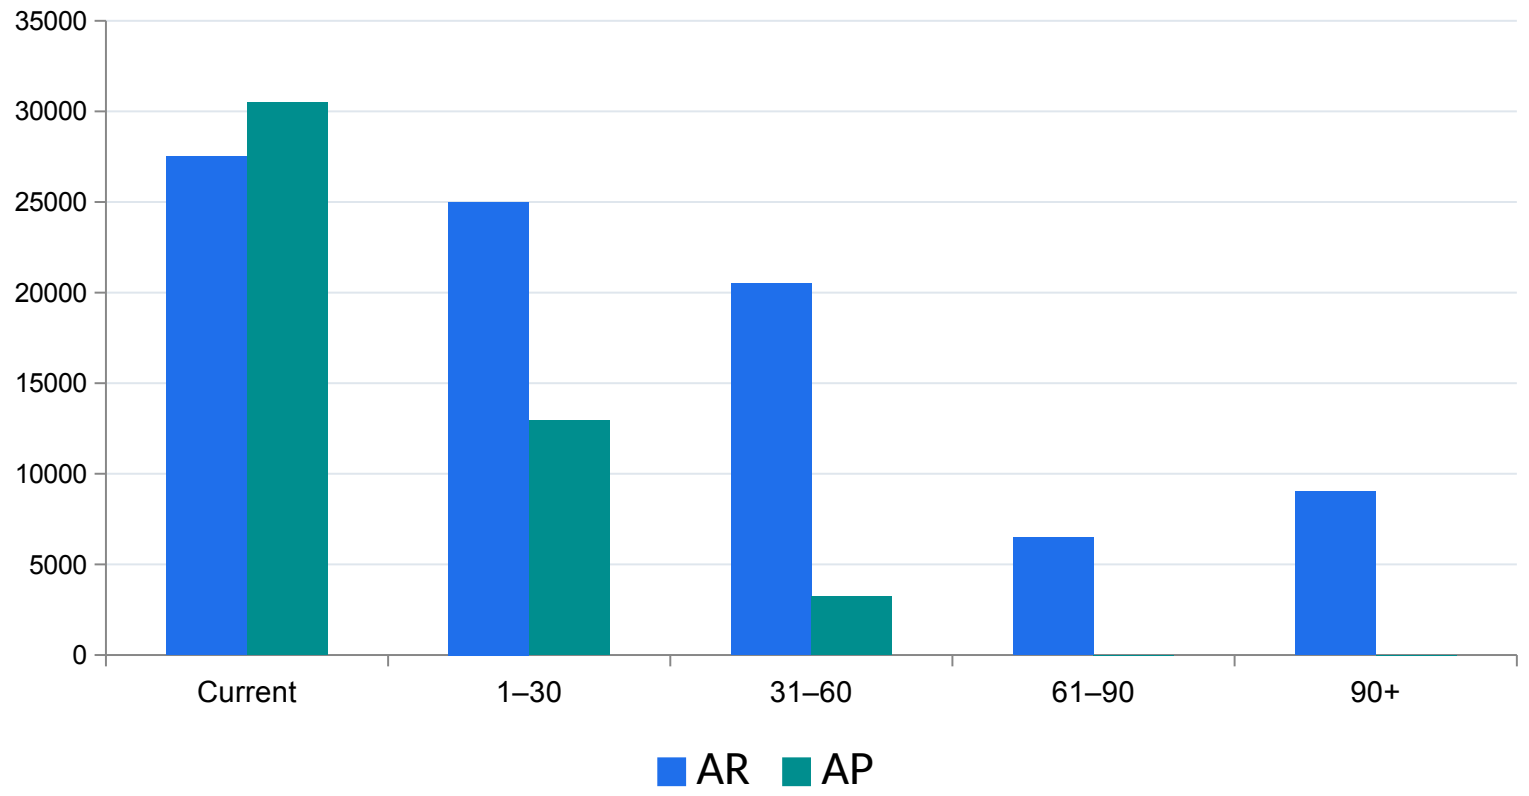

03 For payables, combine ageing with due dates, cash forecast, supplier criticality, discounts, and disputed items.

04 Reconcile ageing totals before presenting working-capital conclusions.

MANAGEMENT INSIGHT

Profitability and variance

1

Lens 1

Bridge revenue, volume/mix, direct cost, gross margin, overhead, and net result across periods or plans.

2

Lens 2

Project and product margin analysis must capture all attributable costs and avoid unassigned expenses.

3

Lens 3

Distinguish one-off, timing, structural, volume, price, mix, and efficiency drivers.

4

Lens 4

Pair every material variance with evidence, an owner, a corrective action, and a target date.

© Tertiary Infotech Academy Pte Ltd

MANAGEMENT INSIGHT

Profitability and variance · Design vs evidence

DESIGN / DECIDE

1. Bridge revenue, volume/mix, direct cost, gross margin, overhead, and net result across periods or plans.
2. Project and product margin analysis must capture all attributable costs and avoid unassigned expenses.

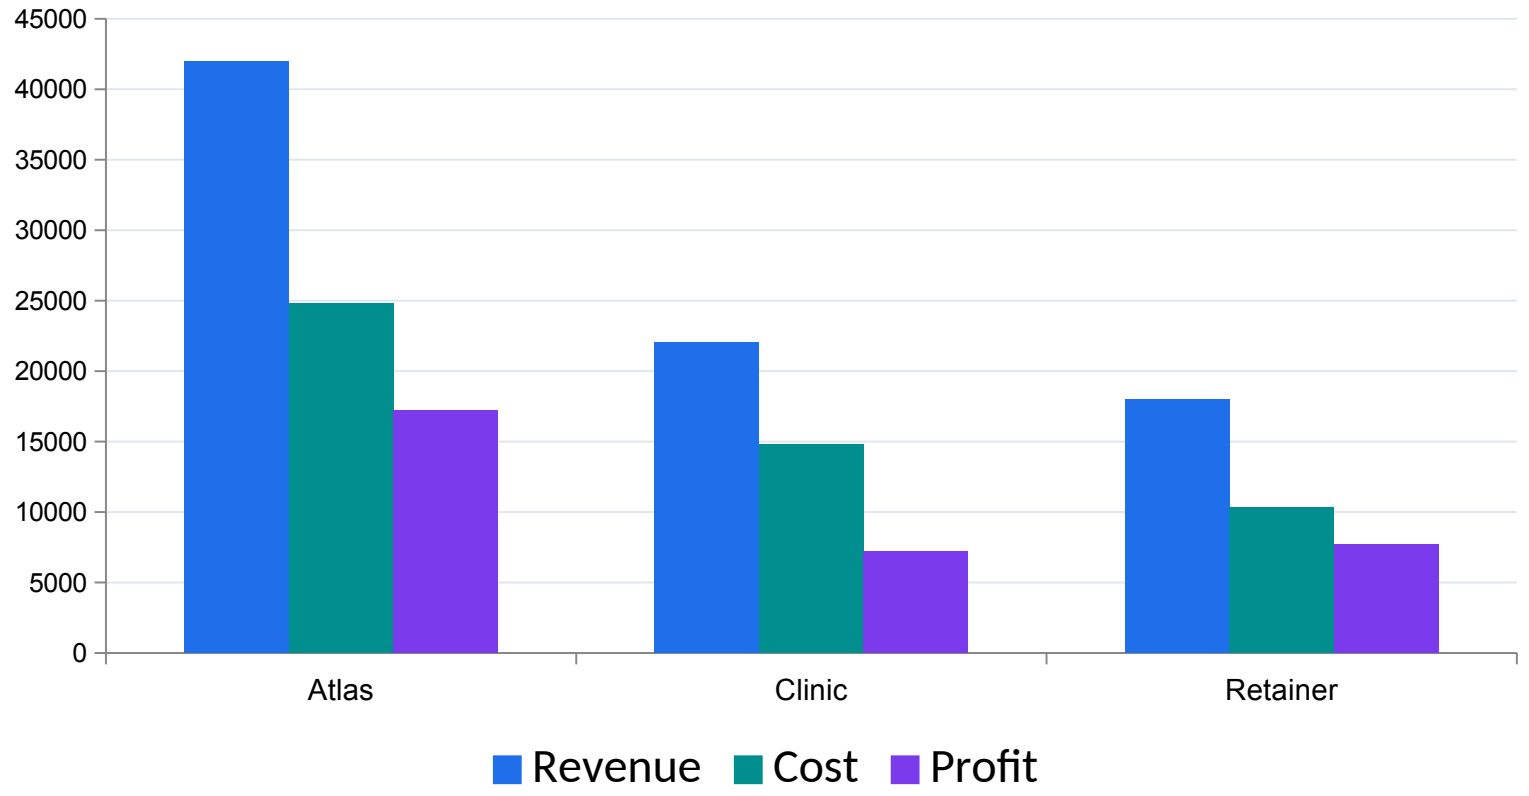

VERIFY / CONTROL

1. Distinguish one-off, timing, structural, volume, price, mix, and efficiency drivers.
2. Pair every material variance with evidence, an owner, a corrective action, and a target date.

EDITABLE NATIVE CHART

Project Margin Comparison

READ THE SIGNAL

- Margin differs by job
- Check unassigned costs
- Compare estimate, actual, and unbilled

© Tertiary Infotech Academy Pte Ltd

Cash flow and liquidity

1

Lens 1

Operating cash is affected by profit, receivables, payables, inventory, tax, and other working-capital movements.

2

Lens 2

Investing activity captures long-lived asset movements; financing captures debt, capital, and distributions.

3

Lens 3

Use bank reconciliations and balance-sheet movements to challenge the cash-flow narrative.

4

Lens 4

A positive profit with ageing receivables and rising inventory can still create a liquidity squeeze.

© Tertiary Infotech Academy Pte Ltd

Cash flow and liquidity · Control flow

1

Operating cash is affected by profit, receivables, payables, inventory, tax, and other working-capital movements.

2

Investing activity captures long-lived asset movements; financing captures debt, capital, and distributions.

3

Use bank reconciliations and balance-sheet movements to challenge the cash-flow narrative.

4

A positive profit with ageing receivables and rising inventory can still create a liquidity squeeze.

GST control and return readiness

1

Lens 1

Singapore's prevailing GST rate is 9%; validate transaction date, place/treatment, tax code, and documentary support.

2

Lens 2

Separate standard-rated, zero-rated, exempt, out-of-scope, reverse-charge, and disallowed input-tax cases as applicable.

3

Lens 3

Tie taxable supplies/purchases and output/input tax from transaction detail to control accounts and the GST working paper.

4

Lens 4

Corrections may require GST F7; retain evidence and escalate tax judgement rather than forcing a QuickBooks code.

© Tertiary Infotech Academy Pte Ltd

Management report pack

1

Lens 1

Executive summary: what changed, why it matters, and the decision required.

2

Lens 2

Core statements: Profit and Loss, Balance Sheet, Cash Flow, with comparisons and consistent basis.

3

Lens 3

Schedules: AR/AP ageing, inventory, project profitability, GST, reconciliation, and exception log.

4

Lens 4

Actions: issue, evidence, impact, owner, due date, and status; preserve drill-down traceability.

© Tertiary Infotech Academy Pte Ltd

FROM DATA TO ACTION

Executive summary: what changed, why it matters, and the decision required.

Core statements: Profit and Loss, Balance Sheet, Cash Flow, with comparisons and consistent basis. Schedules: AR/AP ageing, inventory, project profitability, GST, reconciliation, and exception log. Actions: issue, evidence, impact, owner, due date, and status; preserve drill-down traceability.

Analytical review and red flags

1

Lens 1

Scan for unexpected signs, round-number journals, dormant accounts, suspense balances, and backdated entries.

2

Lens 2

Compare margin, working capital, ageing, inventory days, and tax ratios over time and against operational context.

3

Lens 3

Investigate rather than delete anomalies; document conclusion and evidence even when no correction is required.

4

Lens 4

Management commentary must separate verified facts, estimates, assumptions, and recommended actions.

© Tertiary Infotech Academy Pte Ltd

Analytical review and red flags · Review questions

01 Scan for unexpected signs, round-number journals, dormant accounts, suspense balances, and backdated entries.

02 Compare margin, working capital, ageing, inventory days, and tax ratios over time and against operational context.

03 Investigate rather than delete anomalies; document conclusion and evidence even when no correction is required.

TOPIC 2 PRACTICE

Progressive Activities

Detailed click-by-click instructions, mock data, workbooks, evidence, and acceptance tests are in each activity folder and the Learner Guide.

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 10 · ADVANCED

Build a Reconciled Financial Reporting Pack

SCENARIO

Beacon Services needs a monthly pack for directors after rapid growth created ageing, project-margin, and cash-flow concerns.

GOAL

Produce statements and schedules that tie to validated source data, then explain performance drivers and actions.

DELIVERABLES

1. Reconciled P&L, Balance Sheet, and Cash Flow
2. AR/AP/project schedules
3. Executive variance and action narrative

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 10 · Acceptance Criteria

01 All schedules tie to the GL or explain differences

02 Statements are internally consistent

03 Conclusions cite quantified drivers

04 Actions have owner and date

© Tertiary Infotech Academy Pte Ltd

ACTIVITY 11 · ADVANCED

Prepare a GST Control and F5 Working Paper

SCENARIO

Straits Commerce has standard-rated, zero-rated, exempt, out-of-scope, credit-note, and potentially disallowed input-tax transactions for a quarterly GST review.

GOAL

Validate tax coding, reconcile output/input tax, and identify items requiring correction or escalation.

DELIVERABLES

1. GST transaction review
2. Control-account reconciliation
3. Draft F5 working paper and error/escalation log

© Tertiary Infotech Academy Pte Ltd

NO CLICK-BY-CLICK STEPS ON SLIDES · SEE LEARNER GUIDE

Activity 11 · Acceptance Criteria

01 Output/input tax ties to control accounts

02 Rate and coding exceptions are documented

03 Disallowed/unsupported input tax is excluded or escalated

04 Working paper traces to source

© Tertiary Infotech Academy Pte Ltd

WHAT YOU SHOULD NOW BE ABLE TO DO

Topic 2 Recap

1

Explain

State the accounting logic, not only the QuickBooks action.

2

Reconcile

Tie the source, subledger, GL, report, and evidence.

3

Challenge

Investigate exceptions, estimates, feature availability, and period effects.

4

Approve

Record ownership, judgement, conclusion, and sign-off.

© Tertiary Infotech Academy Pte Ltd

Break · Return on time

Use the activity workbook to record unresolved questions before the next section.

© Tertiary Infotech Academy Pte Ltd

03

TOPIC 3

Accounting Principles and Standards

Singapore reporting framework · recognition and measurement · estimates · disclosures · system-to-standard bridge

© Tertiary Infotech Academy Pte Ltd

TOPIC 3

Key Concepts

1

Singapore context

Use the applicable SFRS(I), FRS, or SFRS for Small Entities framework—not a generic US-GAAP shortcut.

2

System is not policy

QuickBooks records approved accounting treatments; it does not choose the reporting framework or judgement.

3

Recognition and measurement

Timing, classification, estimates, and measurement bases shape profit, assets, liabilities, and disclosures.

4

Qualitative characteristics

Relevance, faithful representation, comparability, verifiability, timeliness, and understandability guide choices.

© Tertiary Infotech Academy Pte Ltd

Applicable reporting framework

1

Lens 1

Determine whether the entity applies SFRS(I), FRS, SFRS for Small Entities, or another permitted framework.

2

Lens 2

Document policy choices, effective dates, transition requirements, materiality, and disclosure obligations.

3

Lens 3

Use current ASC/ACRA/IRAS and professional advice where judgement or regulation is consequential.

4

Lens 4

QuickBooks account names and reports do not establish compliance by themselves.

© Tertiary Infotech Academy Pte Ltd

Applicable reporting framework · Design vs evidence

DESIGN / DECIDE

1. Determine whether the entity applies SFRS(I), FRS, SFRS for Small Entities, or another permitted framework.
2. Document policy choices, effective dates, transition requirements, materiality, and disclosure obligations.

VERIFY / CONTROL

1. Use current ASC/ACRA/IRAS and professional advice where judgement or regulation is consequential.
2. QuickBooks account names and reports do not establish compliance by themselves.

02 Document policy choices, effective dates, transition requirements, materiality, and disclosure obligations.

03 Use current ASC/ACRA/IRAS and professional advice where judgement or regulation is consequential.

04 QuickBooks account names and reports do not establish compliance by themselves.

© Tertiary Infotech Academy Pte Ltd

Accrual and matching

1

Lens 1

Recognise income and expenses when the underlying rights, obligations, and performance occur—not merely when cash moves.

2

Lens 2

Customer deposits may be contract liabilities; unbilled earned revenue may require receivable/contract-asset analysis.

3

Lens 3

Supplier invoices received late do not erase obligations existing at reporting date.

4

Lens 4

Use reversal and clearing logic to avoid double counting when source documents arrive after close.

© Tertiary Infotech Academy Pte Ltd

Accrual and matching · Control flow

Revenue recognition

1

Lens 1

Identify the contract, performance obligations, transaction price, allocation, and satisfaction pattern.

2

Lens 2

Invoice date, payment date, and revenue-recognition date can differ.

3

Lens 3

Project deposits, progress billing, credits, refunds, and variable consideration require consistent policy mapping.

4

Lens 4

QuickBooks forms operationalise the approved policy; they do not replace contract analysis.

© Tertiary Infotech Academy Pte Ltd

Revenue recognition · Three lenses

EVENT

03 Project deposits, progress billing, credits, refunds, and variable consideration require consistent policy mapping.

04 QuickBooks forms operationalise the approved policy; they do not replace contract analysis.

© Tertiary Infotech Academy Pte Ltd

Inventory measurement

1

Lens 1

Inventory includes eligible purchase and conversion costs under the applicable policy, not every related expenditure.

2

Lens 2

Compare carrying amount with net realisable value and recognise write-downs where required.

3

Lens 3

Obsolescence, damage, slow movement, negative quantities, and post-period sales inform the estimate.

4

Lens 4

A quantity adjustment changes both operational records and financial results; evidence and approval are essential.

© Tertiary Infotech Academy Pte Ltd

COST AND NRV

Inventory includes eligible purchase and conversion costs under the applicable policy, not every related expenditure.

Compare carrying amount with net realisable value and recognise write-downs where required. Obsolescence, damage, slow movement, negative quantities, and post-period sales inform the estimate. A quantity adjustment changes both operational records and financial results; evidence and approval are essential.

© Tertiary Infotech Academy Pte Ltd

Property, plant and equipment

1

Lens 1

Capitalise when recognition criteria are met; expense repairs and routine maintenance under the policy.

2

Lens 2

Component, useful life, residual value, method, and start date drive depreciation.

3

Lens 3

Review indicators of impairment and changes in estimates; apply prospectively where required.

4

Lens 4

Maintain a fixed-asset register outside or alongside QuickBooks and reconcile it to cost and accumulated depreciation accounts.

© Tertiary Infotech Academy Pte Ltd

Property, plant and equipment · Review questions

01 Capitalise when recognition criteria are met; expense repairs and routine maintenance under the policy.

02 Component, useful life, residual value, method, and start date drive depreciation.

03 Review indicators of impairment and changes in estimates; apply prospectively where required.

04 Maintain a fixed-asset register outside or alongside QuickBooks and reconcile it to cost and accumulated depreciation accounts.

Foreign currency

1

Lens 1

Record foreign-currency transactions using the applicable transaction-date rate and preserve source evidence.

2

Lens 2

Remeasure monetary balances at reporting date where required; recognise exchange differences appropriately.

3

Lens 3

Distinguish transaction currency, functional currency, and presentation currency.

4

Lens 4

Subscription features and exchange-rate automation do not remove the need for policy, reasonableness, and close review.

© Tertiary Infotech Academy Pte Ltd

Foreign currency · Design vs evidence

DESIGN / DECIDE

1. Record foreign-currency transactions using the applicable transaction-date rate and preserve source evidence.
2. Remeasure monetary balances at reporting date where required; recognise exchange differences appropriately.

VERIFY / CONTROL

1. Distinguish transaction currency, functional currency, and presentation currency.
2. Subscription features and exchange-rate automation do not remove the need for policy, reasonableness, and close review.

© Tertiary Infotech Academy Pte Ltd

Estimates, errors, and policy changes

1

Lens 1

A change in estimate reflects new information; a prior-period error corrects information that was available or could reasonably have been obtained.

2

Lens 2

A policy change follows the applicable standard and transition rules; do not label every correction an estimate.

3

Lens 3

Assess materiality individually and in aggregate, including qualitative effects on users and covenants.

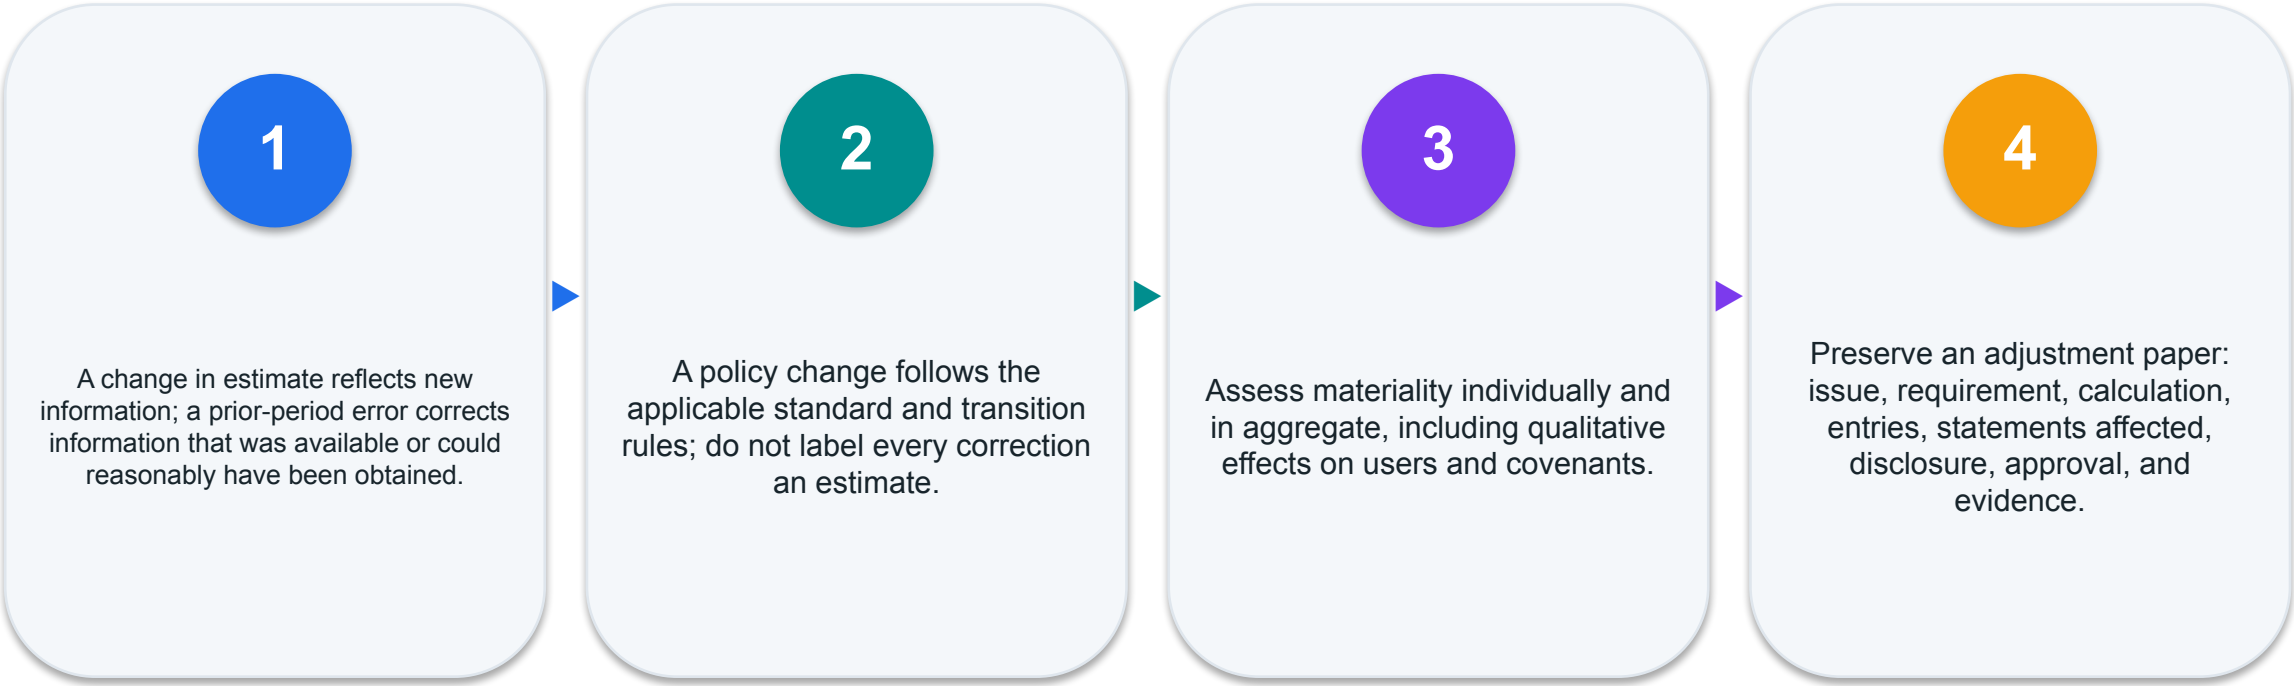

4

Lens 4

Preserve an adjustment paper: issue, requirement, calculation, entries, statements affected, disclosure, approval, and evidence.

© Tertiary Infotech Academy Pte Ltd

Estimates, errors, and policy changes · Control flow

DECISION LENS

Qualitative characteristics

1

Lens 1

Relevance: information can influence decisions; materiality is entity-specific.

2

Lens 2

Faithful representation: complete, neutral, and free from material error—not merely precise-looking.

3

Lens 3

Comparability and consistency help users understand change; consistency is not a reason to preserve a wrong policy.

4

Lens 4

Verifiability, timeliness, and understandability constrain how treatments, evidence, and explanations are designed.

© Tertiary Infotech Academy Pte Ltd

System-to-standard bridge

1

Lens 1

Translate a new or changed requirement into affected transactions, masters, estimates, reports, controls, and disclosures.

2

Lens 2

Determine opening/transition adjustments, effective date, comparative treatment, and audit evidence.

3

Lens 3

Configure accounts, products/services, recurring entries, custom fields, reports, and close checklists only after policy approval.

4

Lens 4

Test the full chain in a sample company before production and document residual manual controls.
